

I am commenting about the potential exclusion of K-LOVE national radio broadcast due to the potential award of Low Power FM frequencies to other companies. As a resident of San Antonio, Texas, K-LOVE serves not only San Antonio but adjacent counties and communities for several miles in all directions. I travel frequently and am able to receive the transmission for 50-75 miles outside San Antonio which leads me to believe that K-LOVE serves the residents of 5-6 counties.

The effect of K-LOVE is extremely positive as an alternative to the vulgar, raucous, and obscene commentary that is played on certain radio stations which are supposedly monitored by the FCC but apparently are not. I can allow my 10 and 8 year old children listen to K-LOVE without fear that they will pick up foul language or learn disgusting acts which are contrary to the values on which this country was founded.

K-Love also serves the public interest by providing a resource for people with needs and donating radio air-time to tell local listeners about a variety of community events on a regular basis. Please reconsider any effort to remove K-Love on its current frequency.
